Speeding up cities and regions’ adaptation and mitigation to climate change through the procurement of climate services using earth observation data
Who can benefit from PROTECT?

Cities, regions and other procurement organisations interested in the potential uptake of climate services through a PCP

SMES, companies and developers with ideas for innovative or disruptive climate services that help adapt and mitigate the effects of climate change

Stakeholder initiatives facilitating the development of climate services through the provision and use of Earth-Observation data

Why should you contribute to the PROTECT project?

• Assistance in defining and aggregating clear and realistic needs for climate services
• Experience sharing and good practice transfer with procurement peers from all over the EU
• Targeted training, continuous knowledge and fresh information on Earth Observation, climate services and innovation procurement
• Insights into climate services market providers’ existing and future solutions and technologies
• Strategic positioning for participating in the upcoming PCP
Key dates for the project

Pre-identification of procurers’ challenges & needs for climate services through an online survey

Jun 22 - Sep 22

Setting up and engagement of the procurers’ community and roll out of awareness raising & capacity building activities

Nov 22 - Dec 22

Organisation of high-level climate services procurement conference

Mar 23 - Nov 23

Finetuning of procurers’ needs for climate services during pinpoint workshops

Sep 23 – Feb 24
